

High Filtration efficiency Particulate Protection Respirator

PARTICULATE KN95 MASK

XPRO SAFETY
Made in China
Pack of 10 pieces

Standards:
GB2626-2006 KN95

- Professional protective mask.
Approved quality standards, efficient filtration of PM2.5 bacteria and dust filtration efficiency is 95%.
- Comfortable wear.
Customized facial design providing good tightness and breathing.

Features:

- PP non-stick non-woven fabric, high-efficiency electrostatic melt-blown,
- ES heat seal cotton non-woven fabric, pp non-stick non-woven fabric are adopted.
- The contour masks is designed according to the ergonomics of the human face to ensure the tightness and increase the breathing capacity of the mask, greatly improve the air permeability and make it more comfortable to wear and breath.

Range of Application:

Suitable for protection of PM2.5 haze particles, food, chemicals, coal dust, cement dust, metal smelting and processing manufacturing.

Validity:
5 Years
