Ice pack size (each piece): 34L x 18Wcm

Before/After absorbing water: 18/600g

each piece of ice pack

Reusable: Yes

Cooling Effect: 12°C up to 15°C

Cooling Period: 4-5 hours each 3 pieces of ice pack

Weight: Approx. 0.61 kg/set including 6 ice packs

## Instruction to use Ice pack in cooling vest to avoid breakage.

How to use/care the ice pack?

Please make sure to wipe the excess water on the surface before freezing. Keep the ice pack spread out one by one in the freezer, no overlap, keep the plastic side contact with freezer. Otherwise, it would be easy to tear up when trying to split them after they frozen solid together.

Suggestion to extend the lifetime

Our suggestion is to wrap a plastic bag outside each ice pack, then it would be easier to split and will not be broken easily

Made in China
